

My family and children are bombarded by marketing campaigns and advertisements from so many sources throughout a day. Wisconsin's no-call list law protects us from unwanted telemarketing calls in the privacy of our own homes. Do not weaken it! I live and pay taxes in the great, progressive state of Wisconsin and it is our right to determine what consumer protections we want. Our representatives in state government passed our law protecting the citizens of Wisconsin from this nuisance. The Federal government under the Bush pro-business administration should not take the people's protections away for the benefit of corporate interests!!!!
